Waste Banned from the Trash

As of February 9, 2006, all "u-waste" items are banned from the trash. For additional information on u-waste, please check the <u>Department of Toxics Substances Control</u> (DTSC) Web site. These common items (see table) are referred to as hazardous waste, and some of them as "<u>universal</u> <u>waste</u>" (u-waste).

The bottom line is that we must keep hazardous materials out of the trash by bringing them somewhere to be recycled or safely disposed such as a household hazardous waste collection facility.

Title	Materials
Lights, Batteries, and	Fluorescent lamps and tubes. Includes fluorescent tubes, compact fluorescent lamps, metal halide lamps, and sodium vapor lamps. LED lights should not be placed in the trash because they often contain metals in amounts that exceed threshold limits. Batteries. Includes all batteries, AAA, AA, C, D, button cell, 9- volt, and all others, both rechargeable and single use. Also lead-acid batteries such as car batteries. Computer and television monitors. Most monitors are currently considered hazardous waste when they have lived their life and are ready for recycling or disposal, including
Electronics	cathode ray tube (CRT), liquid crystal diode (LCD), and plasma monitors. Learn about the State program to offset the cost of <u>proper television and monitor recycling</u> . Electronic devices. Includes computers, printers, VCRs, cell phones, telephones, radios, and microwave ovens. Refer to " <u>How do I know if a particular electronic device can't be thrown in the trash?</u> " for more information.

C E N T E R for the DEVELOPMENT of RECYCLING

	Electrical switches and relays. These typically contain about
	3.5 grams of mercury each. Mercury switches can be found in
	some chest freezers, pre-1972 washing machines, sump
	pumps, electric space heaters, clothes irons, silent light
	switches, automobile hood and trunk lights, and ABS brakes.
	Thermostats that contain mercury. There is a mercury
	inside the sealed glass "tilt switch" of the old style thermostats
	(not the newer electronic kind).
Mercury-	Pilot light sensors. Mercury-containing switches are found in
	some gas appliances such as stoves, ovens, clothes dryers,
Containing	water heaters, furnaces, and space heaters.
Items	Mercury gauges. Some gauges, such as barometers,
	manometers, blood pressure, and vacuum gauges contain
	mercury.
	Mercury thermometers. Mercury thermometers typically
	contain about a half gram of mercury. Many health clinics,
	pharmacies and doctor's offices have thermometer exchange
	programs that will give you a new mercury-free fever
	thermometer in exchange for your old one.
	Mercury-added novelties. Examples include greeting cards
	that play music when opened; athletic shoes (made before
	1997) with flashing lights in soles; and mercury maze games.
	Flammables and poisons. Includes solvent-based (oil) paints
Household	and reactive and explosive materials.
and	Acids, oxidizers, and bases. Includes some pool chemicals
	and cleaners.
Landscape	Pesticides and herbicides. Many pesticides and herbicides
Chemicals	cannot be disposed in the trash. Consult the product label or
	check with your local household hazardous waste agency.
	Latex paint.
Paints and	Oil-based paint (also listed under flammables).
Solvents	Nonempty aerosol paint or solvent cans (all nonempty
	aerosol cans are banned from the trash).
	Solvents. Includes materials such as paint thinners, finger nail
	polish remover, etc.

San Jose State University Department of Environmental Studies *Center for the Development of Recycling* **TEL:** (408) 924-5453 **FAX:** (408) 924-5426 www.recyclestuff.org info@recyclestuff.org Santa Clara/San Mateo County Recycling and Household Hazardous Waste (HHW) Hotline/Website (800) 533-8414

Building Materials	Asbestos. Includes some older kinds of cement, roofing,
	flooring and siding. More information on asbestos in your
	home is available from the U.S. EPA.
	Treated Wood. Includes wood that is treated with chromium
	copper arsenate (CCA).
Automobile- Related	Antifreeze.
	Batteries.
	Motor oil and filters.
	Tires. (Note that tires are not considered hazardous, but
	automotive tires are banned from the trash for other reasons)
Other	Compressed gas cylinders. Includes propane tanks used for
	BBQ or plumbing.
	Needles and sharps generated in home health
	care. Includes hypodermic needles, hypodermic needles with
	syringes, blades, needles with attached tubing, syringes
	contaminated with biohazardous waste, acupuncture needles,
	root canal files, broken glass items such as Pasteur pipettes,
	and blood vials.
	PCB-containing materials. Includes paint and ballasts that
	contain polychlorinated biphenyls (PCB).
	Photo waste (silver bearing).
	Nonempty aerosol cans that contain hazardous
	materials. Many products in aerosol cans are toxic. And many
	aerosol cans contain flammables, like butane, as propellants
	for products like paint. If your aerosol can is labeled with words
	like TOXIC or FLAMMABLE don't put it in the trash unless it is
	completely empty.
